

UNINTERRUPTED POWER SUPPLY SOLUTIONS FOR YOUR MEDICAL LAB EQUIPMENT

ENSURE AN UNINTERRUPTED POWER SUPPLY FOR YOUR MEDICAL LAB EQUIPMENT

Uninterruptible Power Supply (UPS) is a crucial investment for any environment where reliable power is essential, especially for medical lab equipment. It provides instantaneous battery backup power against a wide range of power-related problems, such as power outages, surges, and other electrical issues, ensuring the longevity of many of your electronic devices which are highly sensitive.

Power failure

Harmonic distortion

Line noise

Frequency variation

Under voltage

Over voltage

Power sag

Power surge

3 BENEFITS OF HAVING A RELIABLE UPS SYSTEM IN PLACE

Maintaining and Protection of Sensitive Lab Equipment

Some lab equipment, like centrifuges, incubators, and freezers, can be highly sensitive to power fluctuations. A UPS ensures that these machines continue to operate smoothly even during brief power outages, preventing damage to sensitive components and avoiding disruptions in experiments or research.

Avoiding Contamination

In labs that deal with microbiological or biochemical research, maintaining a sterile environment is crucial. Disruptions in power can lead to issues like temperature fluctuations, compromising the sterile conditions required for experiments. A UPS ensures that these conditions remain stable.

Preventing Data Loss and Corruption

Medical lab equipment often relies on computers or data storage systems to process and analyze results. A sudden power interruption can lead to data loss or corruption, which can be critical in a medical setting. A UPS provides a buffer time for data to be saved properly and systems to shut down gracefully.

MASTER SERIES ONLINE UPS

The Prolink Master Series Online UPS incorporates high density PCB design to meet the industrial standards and requirements to safely protects medical lab and test equipment in situations where uninterrupted power is essential for patient care.

OUR RECOMMENDATIONS:

Master II Series [1-10KVA Tower]

Master II Series [10-80KVA Tower]

ONLINE UPS [1P/1P]

Master II Series [1-10KVA Tower]

- True double-conversion online UPS
- Output power factor 0.9 and 1.0
- Wide input voltage range of 110-300VAC
- Selectable output voltage of 200-240VAC
- 3-stage smart charging design
- Input power factor correction 0.99
- 50/60Hz Frequency Converter Mode
- ECO mode operation
- Generator compatible
- High overload capability and enhanced short circuit protection
- SNMP/USB/RS-232 multiple communications

ONLINE UPS [3P/3P]

Master II Series [10-80KVA Tower]

- True double-conversion online UPS
- Output power factor 1.0
- Generator compatible
- Emergency Power Off (EPO) function
- ECO mode operation
- Touch screen LCD display
- Dual inputs
- Powerful charger design
- Parallel operation with common battery bank (up to 6 units) (optional)
- High overload capability
- Adjustable battery number design

MEDICAL FACILITIES WE WORK WITH

Jivitadana Sangha
Hospital (Myanmar)

Thingan Gyun General
Hospital (Myanmar)

AMERICAN VISION
PROFESSIONAL EYE CARE CENTER

American Vision
(Myanmar)

Sakura Hospital
(Myanmar)

MSU Medical Center
(Malaysia)

Vincente Sotto
Hospital (Philippines)

Aquinas University
Hospital (Philippines)

Premiere General
Hospital (Philippines)

RS Bhayangkara
KalSel (Indonesia)

RSUD Cimacan
(Indonesia)

Remote Monitoring & Management

Power supply monitoring and management is essential to ensure that the UPS systems are operational in the event of an outage. An effective UPS power monitoring software provides critical insights on battery charge, performance and send out alerts during critical. UPS monitoring tools are essential to maintain 100% uptime for the network.

VIEWPOWER UPS MANAGEMENT SOFTWARE

ViewPower is an advanced UPS management software that is designed for users to remotely monitor and manage multiple UPS units physically connected with PC in a networked environment, either by LAN or INTERNET. Better yet, this software could perform scheduled a UPS shutdown when necessary with Shutdown Wizard which is a highly specialized and designed tool to perform shutdown task.

VIEWPOWER PRO UPS MANAGEMENT SOFTWARE

Integrated with SNMP card, ViewPower Pro is a UPS management software to monitor and manage from one to multiple UPSs in a networked environment, either LAN, INTERNET, and serial connection. It's also compatible with Shutdown Wizard which is a highly specialized and designed tool to perform shutdown task.

About Us

Looking back...

Fida International (S) Pte Ltd has been a provider of technologically innovative and user-friendly products manufactured under the brand name "Prolink" since 1991. With more than two decades of professional experience in the information communications sector, Prolink is now renowned as a specialist in its field, especially in the area of Back-up UPS products.

Over the years, Prolink has built its presence through a strong foundation of technological leadership within the South Asian, South-east Asian and Middle Eastern regions and is continuing to build its presence worldwide. With its current network of sales offices in more than 20 countries, customers can be assured that Prolink is able to provide the right solutions to meet the needs of both home and business users within each geographical location both efficiently and effectively.

The company's quest for continuous improvement and quality assurance to its customers has earned us the ISO9001 quality certification since 1999. With its consistently strong commitment to quality, customers can be assured that they are getting true value - superior quality products at affordable prices.

OUR MISSION

ACCENTUATE THE BEST FOR THE E-GENERATION

Prolink aspires to accentuate the best for the e-generation. With technology becoming an essential aspect of modern living, the e-generation concept has gradually become ingrained in our lives and digital literacy is becoming more and more commonplace.

Prolink products are designed to make technology work for the e-generation. Created with the end-user in mind, our products are crafted to enhance performance whether you are at work or play – our products work harder, while you work smarter to achieve your desired results with less effort and better efficiency.
